

**SYSTEM, APPARATUS, AND METHOD FOR PROVIDING  
WEB SERVICES ON MOBILE DEVICES**

5

ABSTRACT

The present disclosure is directed to a system, apparatus, and method for providing Web services from a mobile device. In one configuration, a method involves forming a Web service message at a first network entity. The Web service message is targeted for a mobile terminal. A request is directed to a locator arrangement to assist in processing the Web service message. The Web service message is sent to the mobile terminal utilizing the locator arrangement. The Web service message is sent to the mobile terminal using a mobile services transport protocol and processed at the mobile terminal.
